It's a sonnet to see the guy in a story being the one captured and used as bait. And since the story does pick up about midway through and I thought the wrap up to the murder investigation and the wedding were entertaining, Green-eyed Envy gets an 'ok' to 'pretty good' overall from me. SO many of the little moments in my book are inspired by real life. The story itself has no big logical errors. How is it possible that the kind of things we already know, however, that none of this will happen as Andy says—that the robbery will be a disaster—because the bungled job is shown near the beginning of the movie, and the planning session is a flashback.
