The reaction of health planners and regulators is often to try to thwart or manage this evolution. I think they've been very good about listening to doctors because they're aware that beneficiaries need access to motivated doctors.

YourGarlandScience. To be frank, people have always had different perspectives on whether they should be mandatory. Tech Talk Radio. Close Preview.

Ahierhas50,Twitterfollowersanddecadesofexperiencesinthetrenchesof Innovation Insider. One of the things that has been helpful for us is that while it is important to bring the right tools and technology, it is just as important to bring a team working shoulder-to-shoulder with physicians, nurses, care managers, and others, to understand what it means to make population health real and how we can leverage data and insights to direct that change.
