Sulphur dyes: These are dyes made by reacting sulphur with organic compounds. Traditionally the weft thread is inserted by a shuttle. The longitudinal threads are called the warp and the lateral threads are the weft or filling.

The offer information is here to help you compare against other offers. If you It is the small threads sticking up out of the fabric that gives it its soft 'pile' or surface. In peg or lap loom, this can be done with the fingers, or with a comb-like tool. Clicking on this button will direct you to the product on the associated shop's online store.

The clear and abundant photographs are a definite plus for beginners, and there are many types of looms. These dyes are low-impact synthetic dyes that directly form covalent bonds with cotton fibres rather than merely remaining as an independent chemical entity within the fibre, thus resulting in a long lasting, fast and bright color.
